Dear Sir,

I am writing to express my interest in a software engineering position at your esteemed organization. As a current Software Engineer Intern at Ithra, Aramco, and with a strong academic foundation from the Institute of Information Technology, University of Dhaka, I bring a combination of practical experience and theoretical knowledge that aligns with your team's goals.

My academic journey has equipped me with in-depth knowledge of software development, artificial intelligence, and distributed systems. I also have experience with DevOps practices, including CI/CD pipelines via Vercel. Beyond technical expertise, I have been actively involved in leadership and community roles such as volunteering with YSSE, organizing events, and serving on the student council.

I am confident that my passion for software development, strong problem-solving skills, and collaborative spirit make me a strong candidate for this role. I look forward to the opportunity to contribute meaningfully to your team and further develop my skills in a challenging environment.

Thank you for considering my application. I would welcome the opportunity to discuss how I can add value to your team in an interview.

Sincerely,

Fareya Azam
